Spring Planting

Brings color to your landscape year-round. Green stems turn red in winter, new leaves are red-tinged, turning to green. Fall color is deep red or yellow. Flowers are also red. Fast growing and tolerant of many soils. Grows to 40' to 60'

Rosy pink flowers appear in April. Reddish-purple leaves change to dark green, then to yellow. Forms a spreading, graceful crown. Full sun or light shade. Partial shade preferred in windy, dry areas. Grows to 20' to 30'

A handsome oak with willow-like leaves. Foliage is light to bright green in summer and yellow, yellow-brown and russet in fall. Relatively fast-growing, it tolerates poorly drained soil. Prefers acid soil and full sun. Grows to 40'-60'

As one of the fastest growing trees in its youth, the Sawtooth Oak is an attractive shade tree with dark lustrous summer foliage and clear yellow to golden brown fall leaves. Adaptable to any soil condition except alkaline. One inch acorns are quite popular with wildlife. Grows 40'-60'

Japanese Zelkova is a tough urban tree for residential shade and street plantings. It has a spreading, generally upright branching, vase-shaped habit. The crown is shorter and more rounded than the American elm

Red-brown scales flake to show cream-colored inner bark. Large distinctive leaves with lighter undersides. Fast growing, resistant to anthracnose. Prefers moist, well-drained soil and full sun to light shade. Grows to 75' to 100',

The Japanese lilac is a deciduous, tree-form lilac. It has a moderate growth rate, an upright growing habit, and a rounded shape. It is a mid-size tree belonging to the olive family that is grown for the panicles of white flowers it bears for about two weeks in early summer
