## TERMS AND CONDITIONS OF ROAD OPENING PERMIT

- ALL RESTORATION WORK IS BY APPLICANT.
- A Permit No. will be assigned and the Permit placard to be posted on the job site.
- Applicant must contact Hawthorne Police for traffic control.
- No work to begin prior to 7 a.m.
- No openings or restoration to be done on Saturday, Sunday or Borough holidays.
- No trench may remain open overnight, all openings to be made passable by the end of the day. Steel plates with pins shall be utilized where necessary. Steel plates are not allowed from 11/15 to 4/1.
- Contractor to call per inspection prior to backfilling operation.
- Backfill shall be done with Q.P. stone or other material as approved by the DPW – No excavated material may be used as backfill.
- All work to be done in accordance with the NJ DOT standards for road openings and Passaic County standards.
- Edges of openings to be saw cut – true and square.
- Backfill to be completed in 6” – 12” lifts. Fill to top with 6” of stabilized base and 2” FABC, and for collector streets as directed by the DPW. For local streets, 4” hot mix asphalt stabilized base, and 2” FABC top, or match existing with approval of DPW inspector.
- Cobbles, stones and pavers and curbs must be restored to same condition as prior to excavation.
- Director of Public Works may revise this Permit, per cause, such as when the applicant is not in compliance with the terms and conditions of the permit issued. Work to be completed within ten (10) days of issuance.
- Existing concrete roadways to be restored with concrete-depth-to-match existing and 1” diameter steel dowels at 18” intervals, plus 2” FABC top.
- Applicant must secure a separate permit for any sidewalk work through the Building Department.
- Major permits require a two-year maintenance bond.
- Where concrete is to be used, it is to be Class A.
- Contractor guarantees that the opening/trench shall be maintained within the maintenance period. In performing the final patching infra-red paving may be required for minor applications. Major applications will require resurfacing from curb-to-crown, or curb-to-curb, depending upon the location(s) of the trench(s).
